SKILLS

Languages: C/C++, C Sharp, Python, Java, JavaScript, HTML/CSS
Frameworks: Entity Framework, Identity Framework, ReactJS, Redux, Bootstrap 5,
Tools: Git/GitHub, MySQL, SQL Server, Webpack,VS, VS Code, IntelliJ/PyCharm

PROJECTS

BLOG December 2022 - Now
(Personal)

- Implemented Entity Framework and Identity Framework to develop an admin system for user management and perform CRUD operations on blog posts via DOTNET MVC. Utilized Bootstrap for a responsive and user-friendly interface.
- Integrated OAuth for seamless external logins, enabling users to sign in via Facebook and Google accounts.
- Established role-based authorization, claims, and policies to manage user permissions effectively.
- Implemented a secure password reset mechanism with email confirmation for enhanced security.
- Designed and built a contact page to facilitate user communication and inquiries.

RESTAURANT September 2022 - December 2022
(Personal)

- Utilized REACTJS and Bootstrap 5 to craft a visually appealing and responsive front-end for the restaurant website. The focus was on providing an intuitive and aesthetically pleasing user interface.
- Created dynamic pages for contact, table reservations, and menu presentation. Ensured that the website offers an engaging and immersive experience for users.
- Implemented features such as a contact page for inquiries and a reservation system for booking tables, enhancing user engagement and satisfaction.
- Developed a sophisticated menu display utilizing modern design principles to present the offerings in an attractive and user-friendly manner.
